<td>This looks like a reasonable fix to the pedestrian issue on the bridges. Right now, the sidewalks are too narrow and too close to the driving lanes. I wonder if there will be enough room for a bicyclist to pass a pedestrian on the proposed walkways? Another issue in the area is that the traffic drives too fast over both spans. There are a number of children at Hat Creek that are in danger from the high speeds on San Gabriel Village Blvd and on Austin Ave. Thanks for the opportunity to input. Peg Patrone</td>
<td>Thank you for providing your comment. One of the goals of this project is to provide safe accommodations for pedestrians and cyclists. The east side of the Austin Avenue bridge will have a 10-foot wide shared-use path for pedestrians/cyclists and the west side will have improved 6-foot wide sidewalks for local connections. Both the shared-use-path and sidewalk will provide sufficient width for pedestrians and cyclists. The speed limit of Austin Avenue will remain the same as it is today once construction is complete. Please reach out to local law enforcement through the non-emergency phone line at (512) 930-3510 to share your concerns about speeding vehicles.</td>

</tbody>
</table>
This is a no brainer!!! As is now bikers going to downtown area have to ride an extra mile to the bridge in San Gabriel park if trying to get to downtown or to Austin Ave. The proposed improvements to Austin Avenue do connect the bridge to the hike and bike trail. Currently the earliest anticipated construction date is 2022.

<td>The presentation is incomplete and not substantive, e.g. -what is the scope of work that constitutes &quot;rehabilitate&quot; in this case - what will be done to the bridges? -what is the chronology and sequencing of work once constructions starts? -will two-way traffic be maintained across the bridges at all times during the project or do you propose to shut off access to the Square and other businesses located south of the bridges? -how long will the project take to complete once construction commences? -what will be done to compensate businesses for impairment of access and lost business during construction? -has the project been reviewed and approved by the Texas Historic Commission?</td>
</tr>
</tbody>
</table>

The project is at 30% design, and construction phasing and traffic control information will be included in the final design. This is anticipated to be complete in 2021, at which point more information will be shared with the public.

At least one lane of traffic will be open during construction (aside from some pre-coordinated nighttime closures). There will always be access to properties along the project for ingress/egress and safety. In addition, when construction activities are heaviest, the existing alternative routes to downtown and surrounding businesses will be promoted.

Compensation is not provided for lost business during construction.
The project complied with Section 106 of the National Historic Preservation Act (NHPA). The project team has worked closely with Consulting Parties identified through the Section 106 review process and the project received concurrence from the State Historic Preservation Officer (SHPO) on a finding of no adverse effects to historic properties under Section 106 of the NHPA. Environmental clearance is anticipated in 2021.

Notice and Opportunity to Comment

Austin Avenue Bridges
From Second Street to Morrow Street
CSJs: 0914-05-187
Williamson County, Texas

The City of Georgetown, in cooperation with the Texas Department of Transportation (TxDOT), is proposing to rehabilitate the Austin Avenue bridges crossing the North and South Forks of the San Gabriel River and make pedestrian improvements from Second Street to Morrow Street in Williamson County, Texas. Pursuant to Texas Administrative Code, Title 43, §2.104 this notice is affording an opportunity to comment as part of the environmental review process for this project. You are receiving this notice because records indicate that you own property that would be acquired (in part) for this project.

The Austin Avenue bridges in Georgetown would be rehabilitated for continued vehicular use, and a new pedestrian bridge structure would be constructed to the east side of the existing bridges. The proposed typical roadway section would include two 11-foot travel lanes in each direction, with a 10-foot sidewalk on the east side of Austin Avenue and a 6-foot sidewalk on the west side of Austin Avenue at the intersections of San Gabriel Village Boulevard and Second Street. A trail connection would be constructed at the southeast corner of the Austin Avenue and Morrow Street intersection. The connection would include a 10-foot-wide sidewalk and retaining wall. The Austin Avenue Bridges project totals 0.33 miles.

The project will take place primarily within the existing 80-foot right of way; however, new right of way would be required at the northwest and southwest corners of San Gabriel Village Boulevard (totaling approximately 0.0031 acres) to accommodate the proposed sidewalk, and a temporary construction easement would be required at the northwest corner of Second Street. Although additional right of way is required, no residential or non-residential structures would be displaced. Information concerning services and benefits available to affected property owners and information about the tentative schedule for right of way acquisition may be obtained from the district office at the address listed below.

Any environmental documentation or studies, maps showing the project location and design, tentative construction schedules, and other information regarding the project are on file and available for inspection Monday through Friday between the hours of 8 a.m. and 5 p.m. at the City of Georgetown Public Works Department, 300-1 Industrial Avenue Georgetown, TX 78626, or Georgetown City Hall, 808 Martin Luther King Jr. Street, Georgetown, TX 78626, and online as a virtual open house at https://transportation.georgetown.org/austin-avenue-bridges. You can also contact the City of Georgetown at (512) 930-2544 or the TxDOT Austin District Office at (512) 832-7000. Additionally, responses to comments received will similarly be on file and available for inspection once they have been prepared.

You may submit comments covering the social, economic and environmental effects of the proposed location and design for this project. Comments must be received in writing on or before April 12, 2020. Comments may be mailed to the Austin Avenue Bridges Project at P.O. Box 409, Georgetown, TX 78627, or emailed to: austinave@georgetown.org.

If you have any questions regarding the proposed project, please contact Ray Miller, Jr., City of Georgetown Project Manager at austinave@georgetown.org or (512) 930-2544.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.
AUSTIN AVENUE BRIDGES PROJECT

The City of Georgetown, in cooperation with the Texas Department of Transportation, has identified proposed improvements for Austin Avenue from Morrow to 2nd Streets including two bridges.

PROPOSED IMPROVEMENTS

- Rehabilitate the existing bridges and maintain the railings
- Construct a new pedestrian bridge to the east
- Construct a 10-foot sidewalk on the east side of Austin Avenue and 6-foot sidewalk on the west side of Austin Avenue at the San Gabriel Village Boulevard and 2nd Street intersections

Email: austinave@georgetown.org
Web: austinave.georgetown.org

BACKGROUND

The environmental and design process began in 2016 and has followed the National Environmental Policy Act and Section 106 of the National Historic Preservation Act. There have been four public meetings with significant public input and evaluation of five types of alternatives (no-build, build on new location (one-way pair of bridges), rehabilitation with pedestrian bridge, rehabilitation with widening, and full replacement options). Design schematics and a rendering are available online for those unable to attend the open house. The city will be in contact with more details prior to construction.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

Comments:

The presentation is incomplete and not substantive, e.g.
- what is the scope of work that constitutes "rehabilitate" in this case - what will be done to the bridges?
- what is the chronology and sequencing of work once constructions starts?
- will two-way traffic be maintained across the bridges at all times during the project or do you propose to shut off access to the Square and other businesses located south of the bridges?
- how long will the project take to complete once construction commences?
- what will be done to compensate businesses for impairment of access and lost business during construction?
- has the project been reviewed and approved by the Texas Historic Commission?

Subject: [EXTERNAL] Austin Avenue Bridge Project - Open House Postponed  

[EXTERNAL EMAIL]  
To it May Concern,  

I am sure that this event is postponed due to the “Shelter In Place” order. I would like to be placed on a contact list as to when this event is rescheduled.  

Is there any schematic information that I may be able to review?  
Can I get the project manager’s contact information to discuss this project?  
Who is the consultant handling design? Can I get there contact information?  

Thank you for your help,  

Bruce R. Merrill III, P.E.  
Senior Project Manager

Good afternoon, I hope you are well and staying well.

I know there was a recent public meeting for this project, but I didn't see any news about the ROW phase, and I was wondering if you can tell me when it is expected to begin and how long it might last?

Austin Avenue Bridges Replacement (Austin Avenue from Valley Street to 3rd Street, including the two bridges crossing the North and South Forks of the San Gabriel River)

Thank you in advance,

Ruthie Harvey

There is not much information available online. The project schematic is a low resolution and there is no way to zoom in to see what the text says.
